

# User interface quick-start (touchscreen)

## GESTURES - Introduction

There are many touchscreen gestures that are outlined [here](#). Below are some basics to get you up and running.

To Navigate, simply use one finger to move (**swipe**):

Left or Right - to change Pages

Down - Enter Pages mode

UP - Exit Pages mode

**Tap** to Select and open the TOOL bar on a page.

**Pinch-to-zoom** (fingers stat apart and pinch together) activates the 'Pixel Zoom' function, giving you a clear view of your signal for **critical focusing** & catching tiny details. The PIXEL ZOOM function that allows for a digital zoom on your image. This is helpful for a detailed view of your image for **critical focusing** & catching tiny details.

## PAGES

The entire monitor is based on the concept of customizable **Pages** - instead of having to enable and disable features individually when needing to change a setup, create pages with a **task** in mind, for example **setting exposure**, and quickly **swipe** between each page on-set for a highly efficient workflow.

For a zoomed-out **overview** of your **pages**, **swipe down** on the monitor. Create a new page by swiping over to the **far right** and tapping on '**+ New Page**'. More info on Pages can be found [here](#)

💡 The [SETTINGS](#) page contains all the monitors attributes, Preferences which controls settings that affect the entire monitor is always located to the far left.

The [OUTPUT](#) page allows for you to see/select what signal you are sending downstream (on applicable models).

The [CONTROL](#) page allows for camera control (on applicable monitors, with appropriate license- sold separately).

The [MULTI-VIEW](#) page allows for Side-by-side viewing of two inputs (on applicable models).

## Using Tools

**Tap the screen** to bring up the 'add new tool' menu.

Tools can apply to a single page or all pages.

You can have up to 8 tools in use on a page at the same time (this includes the Global tools).

To Delete a tool, select it, and touch the trashcan icon on the bottom. It will ask you to confirm you want to delete it and selecting it again will remove the tool from your toolbar.

Tools offer a variety of... well... tools, to help you in your filmmaking process and workflows. This should not be associated with the PA who is just there because his Uncle is a producer... These are helpful tools. :)

These Tools are broken down into subsections:

[FRAME](#)

[EXPOSE](#)

[SCOPES](#)

[FOCUS](#)

[OVERLAY](#)

[SCALE](#)

[ADDONS](#)
